WASHBASIN VARIETY WITH ELEGANT DRAIN VARIANTS

Geberit ONE washbasins are available with two different drain variants. The horizontal drain with metal cover is adapted to the design of the washbasins and cleverly placed at the rear edge of the basin. The vertical drain sits classically in the middle of the basin and is equipped with a ceramic cover.

1 Horizontal drain to the rear: The drain is not exposed to the water jet. The elegant cover with comb insert is held in position magnetically. **2** Vertical drain in the centre of the basin: Elegant, flat ceramic cover for a consistently high-quality appearance.

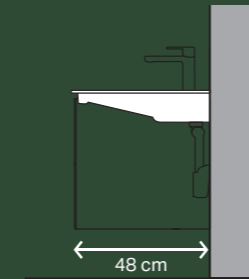

With both drain variants, you can choose between classic washbasins, vanity basins and lay-on washbasins in different sizes and designs. All models are equipped with a space-saving drainage system, which does away with the need for a conventional trap cutout in the washbasin cabinet. This creates additional space in the upper cargo of the washbasin cabinet, for example. Both drain covers also have a comb insert that is easy to remove and clean.

DESIGN DIVERSITY FOR UNIQUE WASHPLACES

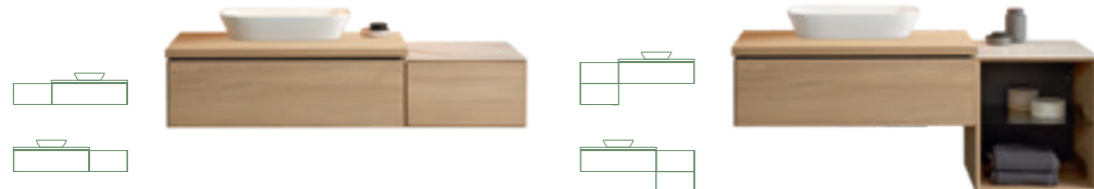

Choose your favourite washbasin, washbasin cabinets, side cabinets and washtops to create the perfect washplace for your lifestyle. Plan your storage space as generously as you need. Make the most of your bathroom floor plan and create the look you like with perfectly coordinated components.

WASHBASIN CABINET with two drawers.

WASHBASIN CABINET with vanity basin in SlimRim design.

WASHBASIN CABINET with washtop for lay-on washbasins.

WASHBASIN CABINET WITH ONE DRAWER
Combination of a washbasin cabinet with one drawer, matching side cabinet, washtop and lay-on washbasin.

WASHBASIN CABINET WITH SIDE ELEMENT
The combination of washbasin cabinet with cargo and side element combines a light look with ample storage space. Optional glass or stone covers are available.

WASHTOP WITH WASHBASIN CABINET for the asymmetrical arrangement of washbasin and washbasin cabinet.

WASHTOP for lay-on washbasins with practical towel rail.

↑ ORDER AND OVERVIEW
Modular organisation systems create clarity in the washbasin cabinet. New LED light strips put the drawer in the perfect light.

↑ CARVED IN STONE
Solid stoneware cover in black or white marble look give the bathroom an exclusive look. Optionally also available in white and lava glass.

↑ BEST CONNECTIONS
An additional socket inside the drawer ensures that there is always a connection for shavers, hairdryers and other appliances.

Clou washbasin drain, space-saving
model

Geberit ONE mirror cabinets are available so that you can design your bathroom furnishings entirely according to your taste and personal preferences. With back-to-wall installation, the storage space is moved behind the wall. This offers freedom of movement at the washplace and ensures a clear, uncluttered look. The models for classic suspension in front of the wall also have a slim design. They can be installed in any bathroom without special preparation.

The model variants are available in two versions: Full-length mirrored doors conceal all cosmetic items inside. Shortened doors create an open, illuminated niche at the lower end. This way, frequently used care items always remain within reach, even when the mirrored doors are closed.

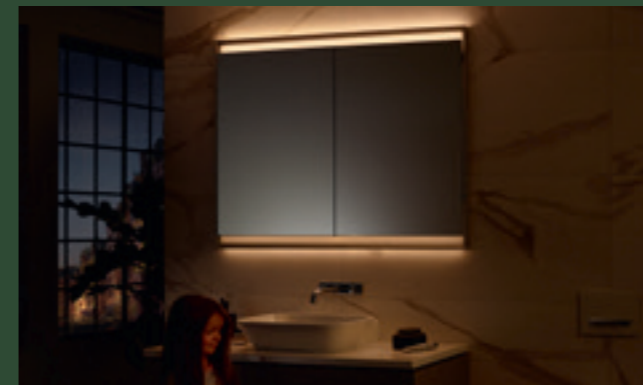

EVERYTHING WITHIN REACH ON THE MIRROR CABINET

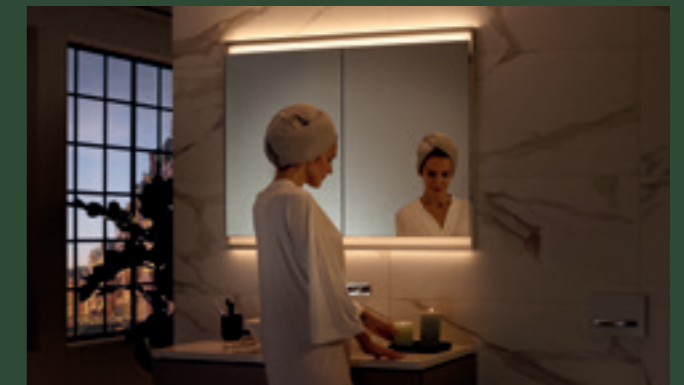

1 Shortened mirrored doors leave a niche free where important care items are always within reach. **2** The back-to-wall installation allows the cabinet to disappear almost completely into the prewall. **3** The glass shelves can be infinitely adjusted in height.

Geberit ONE mirror cabinets provide lighting moods that reflect the bathroom users' daily routine perfectly: bright, clear and invigorating to start the day, soft and flattering before bedtime, discreet and calming as an orientation light at night. The simple operation means it couldn't be easier to find the ideal lighting to suit your own personal biorhythm.

↑
ORIENTATION LIGHT
A soft light that shows the way to the washbasin area at night and makes it easier to fall back asleep.

↑
INDIRECT LIGHTING
Discreet, warm lighting for relaxing hours spent in the bathroom.

↑
STANDARD LIGHT
Glare-free light for everyday routines at the washplace.

↑
WORKING LIGHT
Bright and very clear illumination for intensive beauty care.

WALL-MOUNTED TAP WITH **OPTIMISED POSITION OF THE WATER JET**

ERGONOMIC OPERATION

The separate control of the temperature and the volumetric flow rate on the two rotary knobs makes the Geberit ONE wall-mounted tap convenient and easy to operate.

Geberit ONE wall-mounted taps offer freedom of movement. The large distance between the outlet and the washbasin compared to deck-mounted taps ensures that hands do not come into contact with the washbasin tap. At the same time, the ease of cleaning is improved because the washbasin is not interrupted by the washbasin tap. Geberit offers two design lines in round and geometric shapes.

PERFECT POSITION OF THE WATER JET
Wall-mounted taps in round and geometric shapes to match any washbasin type.

BEAUTIFUL PROPORTIONS CLEVER DETAILS

Hidden wall mounting

Ground clearance

WC seat with SoftClosing mechanism

TurboFlush

Adjustable flush volume

The wall-hung Geberit ONE WC is elegant and harmoniously proportioned. It becomes obvious when you open the WC lid. TurboFlush flush technology: An asymmetrically designed ceramic appliance with a lateral water inlet achieves a unique flushing-out performance. Thanks to the sophisticated installation technology, the WC can be adjusted in height by +3 or -1 cm to suit your individual living situation even years after installation, without having to open the prewall.

1 Quiet, economical and thorough: The asymmetrically shaped ceramic appliance with lateral water outlet sets the flush water in a spiral motion.

CLEANLINESS AND INTEGRATED FLEXIBILITY
For easier cleaning, the WC lid can be removed individually or the WC lid and WC seat ring can be removed completely.
